# CHOOSE TURBOVAC AND GET DUTCH TOP QUALITY

VACUUM PACKAGING EXTENDS THE SHELF LIFE OF PRODUCTS, GUARANTEES QUALITY, PREVENTS PRODUCTS FROM DRYING OUT, PROTECTS PRODUCTS FROM OUTSIDE INFLUENCES AND IMPROVES HYGIENIC HANDLING.

Vacuum packaging is a very cost-effective procedure for preserving perishable food products. It extends the shelf life of products and fully complies with the strict HACCP hygiene procedures. Low packaging material costs and short processing times make vacuum packaging by far the most economical and efficient way to package food hygienically. Vacuum packaging is also the perfect solution for other applications – such as protecting delicate electronics, sterilised medical instruments and money – and can also be used for space-saving solutions.

## **Turbovac redefining the benchmark for vacuum packaging machines**

Turbovac offers a full range of vacuum packaging machines: reliable, robust, and easy to service and maintain. Turbovac recently redesigned its complete range of vacuum packaging machines and made them even easier to operate and clean. The full range of machines and available options makes it easy to select exactly the right solution for your packaging needs.

All models have hygienic easy-to-clean vacuum chambers and easily removable seal beams and silicon bars. An intuitive digital control unit can automatically detect the optimum vacuum level for each product. And for products with a high moisture content, the control unit retains exactly the right amount of moisture. This improves the tenderness and flavour of the products.

With an ingenious redesign focusing on functionality, Turbovac is now setting the standard for quality and design in the industry.
